

PRESTIGE

PRESTIGE
WIDE PLANK FLOORING

INTRODUCTION

Prestige stands for customization, quality, exclusivity, nature and durability and this is to be seen in every design. The customization is recognized in every plank as each plank is handcrafted individually.

All Prestige products are FSC® certified and Cradle to Cradle Certified™ Bronze and therefor contribute to a better and healthier living environment in a crucial way. Because of its own production, from sawing mill to finishing-line, Prestige fully manages its own production development.

One of the requirements of the circular economy, where Prestige measures itself with, is that the product holds its value. This means that no harmful substances are being used during the production process. The presentation of the product determines its value and due to this, the supply of the right quality is of major importance. Prestige stands for the best quality and complies with all import environmental requirements.

‘TO BE ORIGINAL, IS TO RETURN TO THE ORIGINE: NATURE’

Antoni Gaudí - Architect

CRADLE TO CRADLE™

Nowadays Cradle to Cradle™ and circular economy are inseparably connected with one another. But what is this mean? And what does this mean for you as a partner? We would like to inform and assist you further.

What is Cradle to Cradle™?

Cradle to Cradle Certified™ is the ultimate form of sustainability and stands for waste is food. This means that the raw materials you use for production can be fully recycled, without losing any value.

FB+ Engineered Flooring is assessed on five criteria, namely:

1. Material Health
2. Material Reutilization
3. Renewable Energy & Carbon Management
4. Water Stewardship
5. Social Fairness

FB Hout is well reviewed on all the criteria and is one of the few wooden flooring manufacturers in the world that can carry the Cradle to Cradle™ certificate.

What's in it for you?

The advantage to you as a partner is that you comply with our product to the highest environmental requirements. These environmental requirements are very important in the current project market and will be essential in the future. You cannot ignore these changes and FB Hout can relieve you completely in this development. We only supply the most sustainable products as possible.

The revenue model can also be used to offer associated services and maintenance work.

Quality is vital for a product that is Cradle to Cradle Certified™. This is ensured by FB Hout by checks carried out annually by external agencies. This way, FB Hout can, therefore, guarantee the highest quality, which can support your selling point to your customer.

The product we offer gives you the opportunity, in a unique way, to separate your company from your competitors. FB Hout is one of the few Cradle to Cradle Certified™ wood suppliers. By distributing our products you will become a supplier of the most sustainable and innovative high-quality wooden floors.

FSC® CERTIFIED

FSC® fully stands for the Forest Stewardship Council. FSC® is an international organization that sets the standards for what is a responsibly managed forest, both environmentally and socially. FSC® speaks of a responsibly managed forest when the ecological, social and economic aspects are in balance.

How does FSC® work?

A FSC® forest consists of 30 time-sections. It is only allowed to cut from one time-section each year, so that the forest has time to recover afterwards.

All companies that sell FSC® certified products must be part of the so-called Chain of Custody. This means that every company in this chain have to be FSC® certified.

Choose for FSC® certified products and you will be part of the creation of more responsibly managed forests worldwide. More FSC® forests will lead to reduced CO₂ emissions, boycotting of illegal logging and so that indigenous peoples and animals can continue to live in their natural habitat.

What is your advantage of using FSC®?

By using FSC® certified wood you can be sure that your flooring/interior design comes from responsibly managed forests. Besides that this is environmental friendly, it is also an increasing demand for both small and large projects.

By participating in the Chain of Custody of FSC® and choosing for FSC® certified wood, you will enter a completely new market. This offers a lot of opportunities for you as a company in ways of sustainability, marketing and sales.

Sustainability: Sustainable entrepreneurship is one of the most important characteristics that a company must guarantee nowadays. Besides, governments are setting higher standards in terms of sustainability. It is important to go along with this.

Marketing: FSC® offers a lot of support in terms of marketing. Thanks to FSC® it is possible to distinguish you and your company in a competitive market.

Sales: FSC® will enable you to approach new markets in the future. An example of such a new market is the growing project market where FSC® certified products can no longer be ignored.

These days it is often mandatory to use FSC® and Cradle to Cradle Certified™ products within projects. Take this chance as a company!

By choosing FB Hout you will be sure that you will meet all high standards and requirements!

The image is a collage. On the left, there are five vertical panels showing different wood finishes: 'FB LISBON' (light brown with dark knots), 'FB KRAKOW' (dark, distressed), 'FB OSLO' (medium brown), 'FB ATHENS' (light grey), and 'FB PRUNELLE' (dark, textured). On the right, there's a photograph of a studio interior with a wooden floor, a wall of wood samples, and a ceiling with green and brown wood slats. A semi-transparent text box is overlaid on the right side.
